RESEARCHES ON POPULATION ECOLOGY

Volume 15

1973-1974

PUBLISHED BY

THE SOCIETY OF POPULATION ECOLOGY

c/o Entomological Laboratory, Kyoto University
Sakyo-ku, Kyoto, Japan

CONTENTS

Arnason, A. N.: The estimation of population size, migration rates and survival in a stratified population 1

Cole, W. E.: Competing risks analysis in mountain pine beetle dynamics 183

Itô, Y., M. Murai and T. Teruya: An estimation of population density of *Dacus cucurbitae* with mark-recapture methods 213

Kobayashi, S.: The species-area relation I. A model for discrete sampling 223

Kuno, E.: Statistical characteristics of the density-independent population fluctuation and the evaluation of density-dependence and regulation in animal populations 99

Leroi, B.: A study of natural populations of the celery leaf-miner, *Philophylla heraclei* L. (Diptera: Tephritidae) II. Importance of changes of mines for larval populations 163

Matsumoto, B. M. and C. B. Huffaker: Regulatory processes and population cyclicity in laboratory populations of *Anagasta kühniella* (Zeller) (Lepidoptera: Phycitidae) IV. The sequential steps in the behavioral process of host finding and parasitization by an entomophagous parasite, *Venturia canescens* (Gravenhorst) (Hymenoptera: Ichneumonidae) 23

Matsumoto, B. M. and C. B. Huffaker: Regulatory processes and population cyclicity in laboratory populations of *Anagasta kühniella* (Zeller) (Lepidoptera: Phycitidae) V. Host finding and parasitization in a "small" universe by an entomophagous parasite, *Venturia canescens* (Gravenhorst) (Hymenoptera: Ichneumonidae) 32

Matsumoto, B. M. and C. B. Huffaker: Regulatory processes and population cyclicity in laboratory populations of *Anagasta kühniella* (Zeller) (Lepidoptera: Phycitidae) VI. Host finding and parasitization in a "large" universe by an entomophagous parasite, *Venturia canescens* (Gravenhorst) (Hymenoptera: Ichneumonidae) 193

Mukerji, M. K.: The development of sampling techniques for populations of the tarnished plant bug, *Lygus lineoralis* (Hemiptera: Miridae) 50

Patil, G. P. and W. M. Stiteler: Concepts of aggregation and their quantification: A critical review with some new results and applications 238

Sasaba, T., K. Kiritani and T. Urabe: A preliminary model to simulate the effect of insecticides on a spider-leafhopper system in the paddy field 9

Shiyomi, M.: A model of plant-to-plant movement of aphids III. Studies of actual movement and apparent movement by simulation technique 148

Takeda, H.: A preliminary study on collembolan populations in a pine forest 76

Tamaki, G., J. U. McGuire Jr. and J. Onsager: Spatial distribution of the green peach aphid used in estimating the populations of gynoparae 64

Tanaka, R.: An approach to the edge effect in proof of the validity of Dice's assessment lines in small mammal censusing 121

Terman, C. R.: Behavioral factors associated with cessation of growth of laboratory populations of prairie deermice 138

Wool, D.: Quantitative evaluation of temporal similarity in abundance of animal species 90
